PROFESSIONAL ACOUSTIC INSULATION AND ABSORPTION

Acoustic comfort?

HOW TO IDENTIFY AND SOLVE THE FOUR MAIN PROBLEMS

Since 1981 the main goal of Edilteco Group is the continuous research to get the best compromise between quality and cost. This research concerns also the dBred acoustic division, characterized by a range of certified materials in accordance with the current legislation of environmental acoustic comfort. All the proposed products have been tested on site by several accredited laboratories.

However, our engagement goes further, providing to designers and construction companies, a full and complete support, from the design phase to the application. Our effort also consists in providing precise and professional solutions related to the real problems of acoustic insulation. We offer a wide but focused range of products, chosen for their lasting and high quality performances: a solution for every need, from impact sound to airborne sound insulation, from sound absorption to anti-vibration.

All the indications provided in this catalogue are purely approximate and not binding for legal purposes. The data listed has been gathered from laboratory tests and it hence follows that in practical applications on buildings sites the final characteristics of the products may be subject to substantial variations depending on the meteorological conditions and the installations. The user must always check suitability of the product for its specific use, under taking all liability implicit in and deriving from use of the product, as well as comply with all the methods and instructions for use generally referable to "workmanlike" execution. Edilteco S.p.A. reserves the right to change the contents of this catalogue on its final judgements. The spreading of this catalogue through any media, supercedes and cancels the validity of any other catalogue previously published.
