

# DBRED RUBBER M01

ANTIVIBRATION HANGERS

## DBRED RUBBER M01 Antivibration hangers

### APPLICATIONS FIELDS

- Antivibration suspension mounts of acoustic suspended ceiling with boards.
- Antivibration suspension mounts of machinery (ventilators, air conditioning etc.).
- Antivibration suspension mounts of pipes, air-ducts.

### DESCRIPTION

#### Multi-faceted antivibration suspension mounts with dBred Rubber 01.

The antivibration hangers dBred Rubber 01 are made with galvanized steel. The incisions on the clamps allow to easily bend them by hand in order to reach the desired height (see picture below). They can be used for different purposes according to the structure they are used for.

- **(A)**: screwed on the structure profile's side.
- **(B)**: bored into the ceiling with two dowels.
- **(C)**: bored into the ceiling with one dowel.
- **(D)**: fixed to a ring or another fixing device.

1 element, 4 uses - 4 forms in one suspension.

### MAXIMUM LOAD

20 kg for every suspension. **NB: the suspension anchor must be perpendicular.**

All the indications provided in this technical sheet are purely approximate and not binding for legal purpose. The data listed has been gathered from laboratory test and it hence follows that in practical applications on building sites the final products may be subject to variations depending on meteorological conditions and the installation. The user must always check suitability of the product for its specific use, undertaking all liability implicit in and deriving from use of the product, as well as comply with all methods and instruction for use generally referable to "workmanlike" execution. Edilteco S.p.A reserves the right to change the contents of this mechanical data sheet on its final judgment. The spreading of this data sheet through any media, supersedes and cancels the validity of any other technical data sheet previously published.
