

DBRED GIPS RUBBER 01

ANTIVIBRATION HANGERS

DBRED GIPS RUBBER 01 Antivibration hangers

APPLICATIONS FIELDS	<ul style="list-style-type: none"> · Insulation of false ceiling boards. · Fast connection with steel profiles for false ceilings.
DESCRIPTION	<p>Antivibration hangers for false ceiling boards. dbred Gips Rubber 01 hangers provide an antivibration insulation of false ceiling boards. The central hole is $\varnothing 8$ mm for the through bolt. A thread beam can be used to adjust the false ceiling height. The hanger easily hooks to standard profiles for false ceiling 50 x 27 mm. The application time is reduced, as well as the costs. With Gips Rubber 01 a natural frequency of 15 Hz is obtained.</p> <div data-bbox="1077 649 1396 862" data-label="Image"> </div> <p data-bbox="1117 873 1364 896"><i>Example of application on metal profiles.</i></p>
MAXIMUM LOAD	20 kg for each suspension point. <i>NB: the suspension anchor must be perpendicular.</i>

All the indications provided in this technical sheet are purely approximate and not binding for legal purpose. The data listed has been gathered from laboratory test and it hence follows that in practical applications on building sites the final products may be subject to variations depending on meteorological conditions and the installation. The user must always check suitability of the product for its specific use, undertaking all liability implicit in and deriving from use of the product, as well as comply with all methods and instruction for use generally referable to "workmanlike" execution. Edilteco S.p.A reserves the right to change the contents of this mechanical data sheet on its final judgment. The spreading of this data sheet through any media, supersedes and cancels the validity of any other technical data sheet previously published.
