ANTIVIBRATION HANGERS

## DBRED GIPS RUBBER 02 Antivibration hangers

APPLICATIONS FIELDS	<ul style="list-style-type: none"> <li>· Antivibration suspension mount of false ceiling boards.</li> <li>· Antivibration suspension mounts of machinery (ventilators, air conditioning etc.).</li> </ul>
DESCRIPTION	<p><b>Antivibration hangers for board systems.</b></p> <p>dBred Gips Rubber 02 is composed of a galvanised steel hanger, on the top of which an antivibration rubber mount is installed.</p> <p>The hanger can be hanged to the ceiling through a screw on the rubber mount.</p> <p>The antivibration mount dBred Gips Rubber 02 is a product realised with high quality elastomers, with a well known static deflection, in order to define the perfect load for an efficient vibration isolation. With Gips Rubber 02 a natural frequency of 15 Hz is obtained.</p>
MAXIMUM LOAD	20 kg for each suspension point. <i>NB: the suspension anchor must be perpendicular.</i>
<p>All the indications provided in this technical sheet are purely approximate and not binding for legal purpose. The data listed has been gathered from laboratory test and it hence follows that in practical applications on building sites the final products may be subject to variations depending on meteorological conditions and the installation. The user must always check suitability of the product for its specific use, undertaking all liability implicit in and deriving from use of the product, as well as comply with all methods and instruction for use generally referable to "workmanlike" execution. Edilteco S.p.A reserves the right to change the contents of this mechanical data sheet on its final judgment. The spreading of this data sheet through any media, supersedes and cancels the validity of any other technical data sheet previously published.</p>
