WORLD OF CONCRETE - 22-25 JANUARY, LAS VEGAS CONVENTION CENTER.

After the success of the exhibition in Canada, EDILTECO Group continues its adventure in the new continent and participates for the first time to the World of Concrete, the biggest American fair of concrete and masonry.

The goal is to introduce in the United States and North America a new way of building, based on a forty-years Know-How: the Politerm Tehcnology.

From almost 40 years, in fact, Edilteco looks for partners all around the world who want to bring in their country a new patented building system: light, insulating and safe.

To support EDILTECO in this expedition is the producing Mexican partner FANOSA, who joined to the Group in 2017, and the historical partner BAUTECH, Ukraine, witness of a successful investment.
