ESB ACQUIRED THE HISTORICAL COMPANY ROSACOMETTA, A REFERENCE POINT FOR THE PRODUCTION OF BLOCKS AND ARTIFACTS

ESB Srl – manufacturer of mould blocks, infill blocks and production plants for its realization – has recently acquired the historical company Rosacometta, located in Milan.

Rosacometta is one of the main European companies exporting machines and plants for the production of artifacts. Mr. Rosa and Mr. Cometta founded the company in 1904, starting with the realization of small manual machines for the production of blocks.

The following years, they started to manufacture machines with dynamic vibration, developing a full range of products and successfully expanding their business. Their **vibro-compression models** were the first ones introduced **on the international market after the Second World War**. After the death of its founders, the company was officially registered with the name Rosacometta. The company's reputation immediately enjoyed of good reputation, thanks to the good quality of its products and the constant research and development. **The design and realization of fully automatic plants** increased the reputation and the turnover of the company, improving the concrete batching plant and aggregates mixing and dosage systems for the manufacture of blocks. With a century-old experience and know-how, this company realizes fully automatic plants, able to manufacture more than 30.000 blocks in 8 hours, and enjoys of international reputation, given by an excellent quality and technology.

AN INVESTMENT TO INCREASE THE PRODUCTION PLANTS MARKET

“The purchase of THE Italian manufacturer company of artifacts really means be part of this market” - says Marco Luzzana, Technical Director of ESB srl – “We have taken over all the technical documents and all the customers, who have a own production line in the world”.

ESB srl goal is to relaunch the brand, regain the trust of the customers and guarantee them all the support for the spare parts, in order to obtain orders for new plants.

ESB, FROM 2014 A GROWING COMPANY

ESB srl is the result of the partnership between **Edilteco**, international leader company for the production of lightweight thermal insulating mortars, **Manu-Cem**, historical company from Bergamo manufacturing cement artifacts, and **MCL Costruzioni Italia**, a company specialized in the design and application of masonry, in Italy and all over the world.

Founded on January 30th 2014, ESB already boasts of important Italian and international references, such as a production plant in Israel, distributors in Sweden and Norway, a production center in South Italy, as well as many collaborators and designers on the Italian market.

The lightweight blocks lines **Smartblock** and **Easyblock** are the flagship of ESB, coming from a long work of Research and Development. The same goes for ESB's Know-How, which is the result of the experience of three important companies operating in the construction sector from decades. A know-how meant to be exported internationally. In this respect, Edilteco's experience is the reference point. The company from Modena boasts of an ante-litteram international vocation, counting over 40 licensing partners all over the world, who have invested on made-in-Italy technology to manufacturer Edilteco's products in their country.

ESB Srl works follows the same wavelength of **Edilteco**, **Manu-Cem** and **MCL Costruzioni Italia**, thanks to **cutting-edge technological solutions, designed to provide an efficient thermal and acoustic insulation of buildings, according to the customer's needs, and to promote comfortable and eco-friendly systems.**
